# DIGITAL FINANCE: MICAR AND DORA OVERVIEW

The Markets in Crypto Assets Regulation (MiCAR) came into force on June 30, 2023. This regulation requires crypto asset firms to obtain a license to provide their services in the European Economic Area (EEA). To ensure readiness for MiCAR and avoid any surprises, it is important to consider certain factors over the next 18 months.

DORA stands for Digital Operational Resilience Act. It is with this regulation that the EU aims to strengthen the IT security of financial services and industries. This means European banks, insurance companies, investment firms and other similar financial organizations. What it comes down to, in terms of compliance, is to demonstrate resilience in operations in case of a severe IT disruption, such as a cyber-attack.

This webinar will provide a comprehensive overview and update on the Regulation on Digital Operational Resilience (DORA) for the financial sector and the Regulation on Markets in Crypto-Assets (MiCAR) and their practical implications for legal professionals.

## TARGET GROUP

Legal, regulatory and compliance professionals at national supervisors, central banks and the EU supervisory authorities, private sector financial institutions, legal officers in financial services sectors (credit institutions, investment firms and funds), lawyers in private practice dealing with banking and financial regulation.
